Upcoming Webinar: Monday, May 17, 2021

Topics:
• Trends in Nebraska Cash Rental Rates
  • Trends in Nebraska cash rental rates for 2021
  • Financial implications for changing commodity prices and adjusting cash rents
• Proper Communication and Decision Making for Agricultural Land
  • Improving communication between landlords, tenants, and family members
  • Short and long-term decision making for agricultural land
• Ask an Expert
  • Review of submitted questions
  • Upcoming land management workshops and publications
Trends in Nebraska Cash Rental Rates for 2021

PRESENTED BY JIM JANSEN
Nebraska Farm Real Estate Survey

- Annual survey conducted since 1978 of Nebraska agricultural appraisers, professional farm managers, and bankers engaged in the land industry
- Preliminary results for land values and rental rates published the second week of March
- Full report published in June
- Nebraska Farm Real Estate website full access to these resources: https://agecon.unl.edu/realestate

Financial Implications for Changing Commodity Prices and Adjusting Cash Rents

Consider Using Flex Leases Due to Uncertainty in Prices or Yield

- Flexible cash leases vary the rent paid for land based upon the actual performance of the crop yield, pasture, or livestock.
- The actual rent paid flexes with a predetermined range to more equitably divide the financial returns from the property or asset.
  - **Higher** than expected performance results in a final rental rate higher than the agreed upon base rate.
  - **Lower** than expected performance results in a final rental rate lower than the agreed upon base rate.
## Flexible Crop Lease

- Flexible crop lease with changes in corn prices moving up and down.

Should Agricultural Leases for the 2021 Production Season Be Adjusted?

PRESENTED BY ALLAN VYHNALEK
Communications Will be the Key to Successful Leasing

• Both landlord and tenant need to communicate effectively on needs related to leases

• The key to success will be how well you LISTEN
  • Seek first to understand, before you can be understood
  • Ask clarifying questions

• Everyone has been calling over the past 15 months due to unprecedented times
  • Maybe same applies to lease – need to do something out of the ordinary
  • Data shows very large increase for crops and steady/weak prices for livestock over the last 6 months
Communication - Considerations for Tenants

- During the growing season – consider reporting to landlords regularly
  - Moisture – rainfall amounts
  - Weed pressure
  - Disease or insect pressures
  - Other pertinent issues
    - Current crop prices & farm economy
    - Use correct prices for the current marketing year
    - Report increases in other expenses; fertilizer, fuel, repairs, chemicals, etc.
- Remember – communication is critical even for cash leases!
  - Make sure the landlord views the land – in person or virtually
Communication - Considerations for Landlords

• During the growing season – consider visiting with tenants
  • If feasible, consider visiting the land and look around – what events are influencing the property in 2021?
  • As for reports from tenants – if the operators are not communicating regularly
    • Express expectations on:
      • Weed control
      • Other management issues or concerns
• Remember – communication is critical even for cash leases!
Adjustments to Leases by Type

- Do crop share leases need to be adjusted?
  - Typically not – production risk usually shared between landlords and tenants
  - Price risk also shared between landlord and tenant
- Flexible leases may not need to be adjusted depending upon the lease provisions
- So, would cash leases need to be adjusted?
  - Possibly, but what does the lease say?
    - Legally, a change to the terms of the lease or payment rates may not be required.
    - Remember with low commodity prices, the landlords usually have better deal
    - With high commodity prices, sometimes the tenants get the better deal
Cash Lease Adjustments

• Adjusting the lease due to rapid increase in corn prices will be a joint landlord/tenant decision
  • What one party “thinks” should happen does not necessarily matter, but what can be mutually agreed upon

• Consider the gross crop revenue per acre compared to the cash rental rate

• Example: consider center pivot irrigated cash rental rate at $300/acre
  • Expected corn yields of 200 bushels/acre and price $5.85/bushel
  • Gross crop revenue is: 200 bushels x $5.85 per bushel = $1,170 per acre
    • Rent comprises 25.6% of gross revenue (typically in the 25 to 35% range)
    • Depends on area of Nebraska
Cash Lease Adjustments

- Let’s look more at rain-fed soybean example
  - Rent is $180/acre
    - Dryland soybean APH: 40 bushels/acre
    - Price for fall soybeans: $13.50/bushel
  - Gross Income: 40 bushels/acre x $13.50/bushel = $540/acre
  - Rent/Gross Income = $180/$540 = 33.3% of gross income goes for paying rent
    - Remember the typical range is 25-33% (from previous slide)
Pasture Leases

• Plan ahead for the Big 3! Fire, Drought, & Hail

• Landlords need to be clear about management expectations for their pasture (weed control, fertilization, stocking rate)

• Tenants need to report conditions – especially if drought is developing, or if volunteer trees (red cedars) are a problem (for example)
Having a Written Lease is Imperative!

- Not your grandpa’s farm anymore
- Handshake lease agreements may be ended at anytime
- Termination notice must be given by September 1 (previous year)
- Handshake leases for farmland start on March 1
- Fill-in-the-blank written leases may be found at: www.aglease101.org
AgLease101.org – Free PDF Leases

- AgLease101.org – Free PDF leases for landowners and operators

Ag Lease 101 helps both land owners and land operators learn about alternative lease arrangements and includes sample written lease agreements for several alternatives. Ag Lease 101 was created by and is maintained by the North Central Farm Management Extension Committee.

Ask an Expert

PRESENTED BY JIM JANSEN & ALLAN VYHNALEK
**Land Management Questions**

**Question:** What should you do when you have no faith in your current lawyer and need to draw up an estate plan and will?

**Answer:** Find a different lawyer! Website: farm.unl.edu/succession – article recently completed on how to select a lawyer for estate planning
- You can interview potential lawyers
- You can ask about their charges before you incur them
- Be prepared when you go see the lawyer
  - Have a detailed balance sheet completed
  - Write out what you’d like to have happen to your assets
Land Management Questions

**Question:** If a tenant does not pay a landlord in accordance to terms of the lease agreement (amount or when due), does the lease continue until the termination date?

**Answer:** Depending upon the provision in a lease for late payment, a landlord may have grounds for possibly evicting or dismissing a tenant.

- Certain states have specific provisions that allow for a landlord to demand the rent within a set period of time and a tenant may be evicted or a lien placed on the growing crop if rent has not been paid by the end of that period.
- Suggested to use an attorney to communicate with the uncooperative tenant and follow the proper procedure for dealing with late payments.

*** Consult with an attorney for legal advice ***
Land Management Questions

- **Question:** What is a fair rate for use of grain bins? Is the rate charged per month or annually? Should this be included in the cash rent for the property?
- **Answer:** Depends on the size and type of structure of the grain storage facility.
  - Consider renting on an annual basis and charging a flat rate between $0.10 to $0.20 per bushel (monthly charge leaves landlord little options if grain removed early)
  - Tenant pays the full utility bill for the grain bins
    - Rental fee charged for bins reflects the use of the grain bins and utilities
    - Suggested having a separate metered hook-up when possible
Land Management Questions

• Question: Online participants may now submit their questions.
• Answer: Review of questions and answers will be based upon remaining time available.
Upcoming Webinar: Monday, August 16, 2021 at 12:00 PM CDT

Topics:

• 2021 Nebraska Farm Real Estate Survey and Report Estimates
  • Agricultural land values & cash rental rates
  • Special feature report on real estate transactions during COVID-19

• Landlord & Tenant Communication
  • Communicating crop progress on leased land
  • Terminating verbal leases and approaching deadline

• Ask an Expert
  • Review of submitted questions
  • Upcoming land management workshops and publications
