Meeting ID: 997 6771 5474

Dr. Johan Swinnen Director of the International Food Policy Research Institute

Title: Global Food Security in CCC (Conflict, Climate, Covid) Times

Abstract:

The world is not on track to eliminate hunger, and many populations face the triple burden of malnutrition: undernutrition, micronutrient deficiencies, and overweight and obesity. At the same time, food systems are putting pressure on our planetary boundaries. Food and nutrition security vulnerabilities and environmental challenges have been exacerbated by the three C's: Conflict, Climate, Covid-19. In his presentation, Dr. Johan Swinnen will draw attention to the populations disproportionately affected by the effects of climate change, the global pandemic, and the food and fertilizer crisis worsened by Russia's invasion of Ukraine. While high prices are particularly challenging now, price shocks may be the new normal. Dr. Swinnen will therefore explore ways to enhance resilience and inclusive policy responses, highlighting the latest evidence from IFPRI's research.
